

# 4th Vienna Pediatric Brain Tumor Symposium

## 4. Wiener Symposium für Hirntumore im Kindes- und Jugendalter

### Scientific Symposium / Fachsymposium

Thursday, April 16<sup>th</sup> 2026

---

|               |                                                                                                                                                                                                                            |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| from 09:00    | Registration                                                                                                                                                                                                               |
| 10:00 – 10:15 | Welcome Day 1                                                                                                                                                                                                              |
| 10:15 – 12:15 | <b>SESSION 1: INTRATUMORAL HETEROGENEITY AND THERAPY RESISTANCE</b><br><b>Chris Jones:</b> Cell state and drug response / resistance in DMG                                                                                |
| 12:15 – 13:15 | Light Lunch                                                                                                                                                                                                                |
| 13:15 – 15:10 | <b>SESSION 2: INNOVATIVE MODELS FOR PRECISION ONCOLOGY</b><br><b>Laura Broutier:</b> Predictive models in pediatric oncology: Integrating cell state dynamics and organoid systems to rationalize therapeutic combinations |
| 15:10 – 15:40 | Coffee Break                                                                                                                                                                                                               |
| 15:40 – 17:30 | <b>SESSION 3: NOVEL BIOMARKERS FOR DIAGNOSIS AND DISEASE MONITORING</b>                                                                                                                                                    |
| 17:30         | Closing remarks of the day                                                                                                                                                                                                 |
| 19:00         | <b>JOINT SOCIAL EVENT at 10er Marie</b>                                                                                                                                                                                    |

Friday, April 17<sup>th</sup> 2026

---

|               |                                                                                                                                                                                                 |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| from 08:00    | Registration                                                                                                                                                                                    |
| 09:00 – 09:05 | Welcome Day 2                                                                                                                                                                                   |
| 09:05 – 10:55 | <b>SESSION 4: COMORBIDITIES AND THERAPEUTIC MANAGEMENT</b><br><b>Carsten Friedrich:</b> Novel concepts for treatment of Craniopharyngioma and related comorbidities<br><br>Best Abstract Awards |
| 10:55 – 11:15 | Coffee Break                                                                                                                                                                                    |
| 11:15 – 12:30 | <b>SESSION 5: SHAPING MOLECULAR GUIDED THERAPY FOR PEDIATRIC BRAIN TUMORS</b><br><b>Stefan Rutkowski:</b> Stratification and risk-adapted therapy concepts in Medulloblastoma                   |
| 12:30 – 13:30 | Light Lunch + Speakers Corner                                                                                                                                                                   |
| 13:30 – 15:00 | <b>SESSION 6: PSYCHOSOCIAL MODELS AND INTERVENTIONS</b><br><b>Marita Partanen:</b> Neuropsychological assessment and interventions in pediatric brain tumor                                     |
| 15:00         | Closing remarks and outlook on joint sessions and Patient day                                                                                                                                   |
| 15:00 – 15:30 | Coffee Break                                                                                                                                                                                    |
